

**Edna Bay Community Meeting
June 8, 2009**

A session was held during the monthly Edna Bay Community Meeting and residents in attendance were asked to describe healthcare needs for their community. Comments from community members included:

- More frequent visits from Dr. McCandless (Discussion followed regarding the need for community members to call Tideline Clinic ahead of time to schedule appointments rather than wait until Dr. McCandless is in Edna Bay to schedule.)
- Diabetes education.
- Ophthalmology.
- Need for Public Health visits – especially for well child screens and immunizations. Will be even more important with the school closing this year.
- An Edna Bay Health Fair is being planned for the fall.
- Can ARMC get access to Tideline Clinic medical records in emergencies.
